## F.A.Q. on Tender for Preparation of database and adaptive model for thermal comfort of occupants in residential buildings of India

S. No.	Clause Reference	Query/Question	Reply from GIZ
1	2.2.1 - General Terms of Reference for the contractor Pg. No. 06	Profile of Bidder/Consultant/Consulting Firm Eligibility Criteria for Bidder/ Consultant/ Consulting Firm: - Experience of executing at least 5 Reference projects in monitoring of thermal comfort system and post occupancy evaluation through occupant feedback". <b>Can the experience of commercial building post occupancy evaluation be considered as relevant experience, or one must have experience similar experience in residential projects.</b>	The experience of post occupancy evaluation in commercial building will be considered as relevant experience. however, the experience for the same in residential building will be preferred.
2	Section: 2.4.2 - Detailed Specifications (Work Packages) Pg. No. 08	Carry out field surveys and monitoring as per developed plan spread over one complete year: - Minimum number of samples for each location is to be determined following sampling principles with 95% confidence level and 5% margin of error." <b>Could you kindly clarify a bit more on the minimum sample size? Since there is no confidence interval and with-it different people would come up with different sample size. It would be very helpful if you would be able to shed some more light on this point.</b>	In each city, there need to be minimum 385 representative subjects (persons) on which study needs to be conducted in each season.
